DETAILED ACTION

Specification

1. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

Oath/Declaration

2. The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because:

The signature of instant inventor Yang is missing.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

4. Claims 1-7,9-11 and 13-20 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by US 2002/0117405 A1 to Wang et al.

Art Unit: 2854

With respect to Claims 1-5,10-11,13-15,18 Wang teaches that the reels 551(take-up reels) have bar codes(readable input) on them, the reading of the ID(machine readable code) and making a record(database) on page 6 @ [0046]. Further, Wang teaches the reading of an ID when the reels(carriers) are mounted on 6 @ [0046] where he says "...updates its database by assigning the labels in each column on the spool to one of three reels which is noted in field 70 when the reels and spools are mounted...."

Further, Wang teaches the computer readable medium(shop floor controller with memory and programs) on page 5 @[0038]. With respect to Claims 6,20, note the rejection of Claims 1-5 and note that the spools of Wang are the sub webs of the reels of Wang as indicated on page 6 @[0046]. With respect to Claims 7,9,19, the carrier's (reel's) bar code is read when it is placed on the feed side of the slit as indicated by Wang on page 6 @ [0046]. With respect to Claims 16-17, Wang teaches the structure of the client computer (computer 512) receiving information on page 5 @ [0038].

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 8 and 12 are rejected under 35 U.S.C. 103(a) as being unpatentable over US 2002/0117405 A1 to Wang.

With respect to Claims 8 and 12, Wang teaches all the limitations except that a second carrier is being mounted. However, given that Wang teaches that a first carrier is

mounted it would have been obvious to one of ordinary skill in the art to repeat the technique of Wang for as many carriers as were available so as to track the carrier ID as taught by Wang.
